

# Biotechnical Engineering

## Semester Syllabus

Five major units to be covered in this semester are:

- Safety and Documentation
- History, Biotechnology Industry, and Biotechnical Ethics
- Biochemical Engineering: Forensics and DNA
- Environmental and Agricultural Engineering: Fermentation
- Biomedical Engineering

You will have regular quizzes and a test at the end of each unit. Your unit tests will always be cumulative which means they will include questions from all prior units as well as the one we just finished. I promise I will not test you on material you have not learned. Remember that tests and projects account for 45% of your grade so please be sure to get an early start on your projects.
