The biome poster project is about a particular land biome. Your group will create one poster that must include the following:

1. **Poster Title**
   - Your poster title should be neat, colorful, and large enough to easily read.

2. **Pictures of Plants**
   - You must include at least 3 pictures of plants that are typically found in your biome.

3. **Pictures of Animals**
   - You must include at least 3 pictures of animals that are typically found in your biome.

4. **Picture of the Physical Environment**
   - You must include at least 1 picture of this
   - These can be landscape or scenery pictures that show a nice overview of what the environment of the biome looks like.

5. **Labeling of Pictures**
   - All pictures must be labeled with the category they are representing (plant, animal, or physical environment.)
   - Each picture may be used only once for one category – for example, you may not use the same picture as plants and physical environment.

6. **A World Map Showing Where on Earth Your Biome Is Located**
   - The map must show your biome only – use one color to shade in the area of the globe represented by your biome. Use a second color for everything else.
   - A key must be included.

7. **A Well-Written Paragraph Summarizing the Main Characteristics of Your Biome**
   - Your paragraph must include the following:
     - Basic location on earth
     - Typical plants
     - Typical animals
     - Climate – temperature and precipitation
     - Other interesting information

8. Your poster must be colorful and neatly designed and organized! Plagiarism will not be tolerated. Any student who plagiarizes will receive a zero on this project.

My Biome = ____________________________________________

**Biomes:**

1. Freshwater
2. Marine
3. Arid Desert
4. Semi-arid Desert
5. Coastal Desert
6. Cold Desert
7. Tropical Forest
8. Temperate Forest
9. Boreal Forest
10. Savannah Grasslands
11. Temperate Grasslands
12. Arctic Tundra
13. Alpine Tundra
14. Estuaries
15. Chaparral Forest
16. Wetlands
